Corporate Sponsorships: Local business choosing from from of our sponsor categories.

Private fundraising, sales and events.

Donated Labor: Genrous volunteers that have offered to provide free labor for services needed on site.

Sponsorship Opportunities

What's Next?

The Danville Dog Park is close to becoming a reality. With the general support of the community, we are readying for a 2026 construction start.

Thanks to the generous support of our community and supporters, we've developed a site plan and an independent cost estimate that will support our grant writing. We've already submitted for two grant opportunities and we will continue to apply for more to help cover our costs.

Corporate sponsorship from our vibrant business community is also essential to our funding strategy. Fortunately, our commercial grade fence offers significant visibility for your corporate message, front row and center to all visitors!

Location

Strategically located at the midpoint of the most heavily used segment of the Lamoille Valley Rail Trail (LVRT), the park will connect four thriving communities: St. Johnsbury, Hardwick, Danville Village, and West Danville. Designed to serve both local residents and trail users, the park will provide a much-needed outdoor resource for dog owners and families alike.

406 Route 2 East, on a 6+ acre Town-owned parcel of land, upslope of the Town's waste water treatment plant. Users will enter by the Lamoille Valley Rail Trail, and the uses will be fully separated by commercial grade fencing for user safety and convenience. This is a great use of open land that cannot be available for housing or business.

Phase 1

Targeted for Early 2026
Site clearing, install a culvert and create trail access, commercial grade fencing, and service access for mowers and maintenance equipment.

Estimated cost, including contingency:
\$74,350.

Phase 2

Targeted for 2027
Shaded pavilion and frost-free water line
Estimated cost, including contingency:
\$33,000.

Site Plan
