I wanted to touch base regarding the North Danville road across from Bill Murrey's house. I know it's on your radar. In the past I've asked to have a chain link fence installed and danger signage. I believe the Town is now at a point where it has become more necessary. The apple tree which has been referenced in the past has now been undermined and is leaning toward the road. People are stopping to walk over and look. It's a dangerous situation that has become more so. Good luck with this as I'm sure it will cost a great deal to address. But, bad news isn't like wine, it doesn't get better with age.
